Introduction

Live Art Ireland is an Artist in Residency programme based at Lisheenboy House (formerly known as Milford House) in North Tipperary, also known as the Ealaiín Bheo Centre for Art Research and Development. With a focus on live art practices and artists who produce work outside mainstream or normative arts institutions, Live Art Ireland creates opportunities for both local, national and international artists working in the areas of live art and performance art, contemporary dance, participatory practice and artist film and video.

The organisation is embedded within a working heritage estate, a three-storey 17th century Georgian house with a layered and storied history, set on 17 acres of rewilded land combining open fields, lawns, and mature woodland.

Milford House is an old building and a protected historical structure. The building is not wheelchair accessible, however we are working towards raising funds for a lift from the ground floor to the first floor. We would like to work with visitors to work around the limitations of the house to enable their visit. All information in this document aims to aid in this.

There are three cats and two dogs that live permanently at Live Art Ireland. The cats live in the main house and have access to all rooms except bedrooms. The dogs live in the cottage in the backyard with Deej and are not allowed to enter the main house, so the doors must always be shut.

This is a living document, so if there is anything that could make or has made your visit easier, please send an email to live.art.ireland@gmail.com. If you have any access needs not covered in this document, or would like to discuss access support arrangements, please do not hesitate to get in touch with us directly.
